DESCRIPTION REVIEWS (0) SHIPPING & DELIVERY

Being a customer-oriented enterprise, we provide a wide array of **Micron Doctor Blade Steel**.

Feature	High Quality
Material	Carbon Steel Blade
Size	Multiple
Color	SS Color
Usage/Application	Printing

Related Post:- Plastic Doctor Blade

Advantages of Micron Doctor Blade:

- The job runs continuously without change of doctor blade in between
- Minimal pressure on the cylinder enhances life
- Continuous running means no machine downtime
- No costly Grinding accessories required
- Ink remains clean and free from any grinding waste
- No fear of injuries with Micron Doctor Blades

Why only Micron Doctor Blade:

- Proper heat treatment imparts maximum life
- Precision profile grinding eliminates the triaxiality of stress
- Steel has the best metallurgical properties
- The composition of steel is selected explicitly for Doctor blade application
- Extra long edge (constant contact ground part) lasts longer
- Ultimate surface finish improves the endurance limit of the steel
- Perfect lapping over the entire edge eliminates the costly grinding accessories
- Highly skilled technical staff ensure the best quality incoming raw material, material in process & outgoing finished product

Rotogravure printing doctor blades Steel is an essential component of many printing and coating machines. They are used to remove excess ink or coating from the surface of the printing cylinder or anilox roll, ensuring a precise and consistent transfer of ink or coating to the substrate.

Doctor blades are typically made from high-quality steels that are hard, wear-resistant, and have excellent edge retention. The most common types of steel used for doctor blades are stainless steel and carbon steel.

The selection of the right doctor blade steel depends on the specific application requirements and machine type. Consult with the machine manufacturer or Flexo printing doctor blades Steel supplier for recommendations on the best blade steel for your application.
